

Performed at the supplier's facility, Verify source inspections examine purchased products to validate conformance to all customer requirements. Source inspections minimize risk when suppliers have a history of performance issues or when products are complex, expensive, have long delivery times, or are drop shipped. These services are delivered through on-demand independent product inspections, tests, and documentation.

VERIFY BEST PRACTICE

DESIGN

Create customized source inspection programs that include procedures, checklists, forms, and training programs.

RESOURCE

Screen and qualify Project Specialists based on technical skills and proximity to suppliers.

MANAGE

Program manage and technically support inspection services utilizing online tools for real-time access to schedules, status, results, and reports.

BENEFITS

- ◆ Nonconforming product is contained at the supplier site
- ◆ Customers receive compliant product
- ◆ Increase flexibility for changes in workload
- ◆ Assure improvements in supplier, program, and business performance
